**BorelissPro®**

Dietary Supplement

## BorelissPro®

**BorelissPro®**, uses the proper components and the innovative formula of antioxidants, which reinforces the effects of the specimen. It makes the product – a fully natural supplement – work with the increased effectiveness.

All the components in the **BorelissPro®** stimulate the immunology of the organism and alleviate the effects of tick-bites.

### Prof. Wiktor Stelmach, Medicine and Pharmacy PhD

Laureate of the Minister of National Education for his achievements in the didactic and educational work. Professor of the Open International University of Complementary Medicines in Colombo [Sri Lanka]. Member of the National Geographic Society, Member of the Commonwealth Real Institute of Acupuncture and Natural Medicines. Board

member of the Fithoterapy Section of the Polish Medical Association. Author of numerous studies on modern technologies in the field of the production and the quality control of the medicines and the author of several original herb medicine recipes which were rewarded for their therapeutic effectiveness.

*„More and more often in my professional work do I deal with the cases of Lyme borreliosis, which is hard to be diagnosed a disease and really difficult to be treated effectively. The Lyme disease, when wrongly treated, wreaks damage on the human organism. Natural medicine appears to be indispensable here. Its wisdom has been used in the BorelissPro® supplement which I recommend to my patients.”*

### Piotr Kardasz, PhD

Biologist, journalist, author of many publications and films in this subject, author of dissertations on phytoremediation. Head of the Scientific Council of the Health Prevention Institute. Head of the Duolife Scientific Council.

*„Thanks to the use of the innovative formula of the selection of only natural components which guarantee the mutual synergization, the BorelissPro® dietary supplement achieved the unique effectiveness in the Lyme borreliosis prevention and minimalizing the effects of the tick-borne diseases.”*

**BorelissPro®** gives our organism a lot of precious components with a big amount of antioxidants, which help the immune system function properly and help to cleanse the organism.

## BorelissPro®

**Garlic extract** contains flavonoids and the considerable concentration of organic sulphur accumulated in alliin and scordinin. Garlic has a positive influence on the work of our heart and keeps the proper level of cholesterol. However, its positive impact on the immune system is best known.

**Fuller's teasel root extract** helps to cleanse the organism and shows the immune-stimulating properties. It contains precious iridoids, which enable to keep our joints and bones in good condition. Fuller's teasel root extract strengthens and stimulates the immune system.

**Japanese knotweed extract** intensely stimulates the immune system, help to detoxify the organism and minimalizes the effects of the contact with ticks.

**Oregano extract** shows strong immune-stimulating properties. It is also a rich source of flavonoids making it possible to protect the cells from radicals.

**Cistus herb extract** is a great source of polyphenols. It shows antioxidant properties and effectively helps out the immune system. It positively influences the quality of life, slows the aging processes of the organism and helps to keep the skin in good condition. Cistus herb extract has a positive impact on the micro biota.
